GENERAL DIRECTIONS

Where shortening is mentioned in the recipes it is understood that butter or lard, or an equivalent quantity of butter substitute or vegetable oil may be used.

MEASUREMENTS

All measurements for all materials called for in the recipes in this book are level.

The standard measuring cup holds one-half pint and is divided into fourths and thirds.

To make level measurements fill cup or spoon and scrape off excess with back of knife.

One-half spoon is measured lengthwise of spoon.

Sift flour before measuring.

BAKING

Much depends upon the baking. Many a cake otherwise perfectly prepared is spoiled because the oven is too hot or not hot enough. Regulate the oven carefully before mixing the ingredients.

When a cake is thoroughly baked it shrinks from the sides of the pan. A light touch with the finger which leaves no mark is another indication that the cake is baked.

TABLE OF EQUIVALENT WEIGHTS AND MEASURES

1 saltspoon = $\frac{1}{4}$ teaspoon
3 teaspoons = 1 tablespoon
16 tablespoons = 1 cup
2 cups = 1 pint
2 pints = 1 quart
4 cups = 1 quart
2 cups granulated sugar = 1 pound
4 cups flour = 1 pound
2 cups butter = 1 pound
2 tablespoons butter = 1 ounce
2 tablespoons liquid = 1 ounce
4 tablespoons flour = 1 ounce
1 square unsweetened chocolate = 1 ounce
 $3\frac{1}{2}$ tablespoons cocoa = 1 ounce

BREADS, BISCUITS AND ROLLS

Dr. Price's Baking Powder may be used instead of yeast to leaven bread. It does precisely the same work; that is, raises the dough, making it porous and spongy. The great advantage of bread made by this method is in time saved, as it can be mixed and baked in less than two hours. Milk bread needs little or no shortening, and less flour is required than when water is used. Sift flour before measuring, and use level measurements for all materials.

BAKING POWDER BREAD

- 4 cups flour

- 1 teaspoon salt
- 1 tablespoon sugar
- 7 teaspoons Dr. Price's Baking Powder
- 1 medium-sized, cold, boiled potato
- Milk (water may be used)

Sift thoroughly together flour, salt, sugar and baking powder, rub in potato; add sufficient liquid to mix rapidly and smoothly into soft dough. This will require about one pint of liquid. Turn at once into greased loaf pan, smooth top with knife dipped in melted butter, and allow to stand in warm place about 30 minutes. Bake in moderate oven about one hour. When done take from pan, moisten top slightly with cold water and allow to cool before putting away.

BOSTON BROWN BREAD

- 1 cup entire wheat or graham flour
- 1 cup corn meal
- 1 cup rye meal or ground rolled oats
- 1 teaspoon salt
- 5 teaspoons Dr. Price's Baking Powder
- $\frac{3}{4}$ cup molasses
- $1\frac{1}{3}$ cups milk

Mix thoroughly dry ingredients; add molasses to milk, and add; beat thoroughly and put into greased moulds $\frac{2}{3}$ full. Steam $3\frac{1}{2}$ hours; remove covers and bake until top is dry.

CORN BREAD

- 1 cup corn meal
- 1 cup flour
- 4 teaspoons Dr. Price's Baking Powder
- 3 tablespoons sugar
- 1 teaspoon salt
- $1\frac{1}{2}$ cups milk
- 1 egg
- 2 tablespoons shortening

Mix and sift dry ingredients; add milk, beaten egg, and melted shortening; beat well and pour into greased shallow pan. Bake in hot oven about 25 minutes.

SPIDER CORN BREAD

- 1 egg

- 1 $\frac{3}{4}$ cups milk
- 2 tablespoons sugar
- 1 cup corn meal
- $\frac{1}{3}$ cup flour
- 1 teaspoon salt
- 2 teaspoons Dr. Price's Baking Powder
- 1 tablespoon shortening

Beat egg and add one cup milk; stir in sugar, corn meal, flour, salt and baking powder which have been sifted together; turn into frying pan in which shortening has been melted; pour on remainder of milk, but do not stir. Bake about 25 minutes in hot oven. There should be a line of creamy custard through the bread. Cut into triangles and serve.

GRAHAM BREAD

- 1 $\frac{1}{2}$ cups flour
- 1 $\frac{1}{2}$ cups graham flour
- 4 teaspoons Dr. Price's Baking Powder
- 1 teaspoon salt
- 1 tablespoon shortening
- 1 egg
- 1 $\frac{1}{2}$ cups liquid ($\frac{1}{2}$ water and $\frac{1}{2}$ milk)
- 2 tablespoons sugar or molasses

Mix flour, graham flour, baking powder and salt together; rub in shortening; beat egg and add with sugar or molasses to liquid; stir into dry mixture and beat well; add more milk if necessary to make a drop batter. Put into greased loaf pan, smooth with knife dipped in cold water. Bake about one hour in moderate oven.

NUT OR RAISIN BREAD

- 2 $\frac{1}{2}$ cups flour
- $\frac{1}{2}$ cup graham flour
- $\frac{1}{4}$ cup sugar
- 1 teaspoon salt
- 1 cup walnuts or raisins
- 4 teaspoons Dr. Price's Baking Powder
- 1 egg
- 1 $\frac{1}{2}$ cups milk

Sift dry ingredients together. Add raisins or nuts chopped not too fine; add beaten egg to milk and add to dry ingredients to make a soft dough. Put into greased loaf pan. Allow to stand about 30 minutes. Bake in moderate oven from 45 to 60 minutes.

PEANUT BUTTER BREAD

- 2 cups flour
- 4 teaspoons Dr. Price's Baking Powder
- 1 teaspoon salt
- ½ cup sugar
- 1 cup milk
- ⅔ cup peanut butter or ½ cup finely ground peanuts

Sift flour, baking powder, salt and sugar together. Add milk to peanut butter or peanuts, blend well and add to dry ingredients; mix thoroughly. Bake in greased loaf pan in slow oven 45 to 50 minutes. This is best when a day old. It makes delicious sandwiches cut in thin slices and filled with either cream cheese or lettuce and mayonnaise.

PRUNE OR DATE BREAD

- 1 cup prunes or dates
- 2½ cups graham flour; or 1 cup flour and 1½ cups graham flour
- ¼ cup sugar
- 1 teaspoon salt
- 4 teaspoons Dr. Price's Baking Powder
- 1 cup milk
- 1 tablespoon shortening

Wash prunes, soak several hours, drain, stone and chop, or use dates stoned and chopped. Mix flour, sugar, salt and baking powder; add milk to make soft dough and beat well; add fruit and melted shortening. Put into greased bread pan; allow to stand about 30 minutes in warm place. Bake in moderate oven one hour.

LUNCHEON OR SANDWICH ROLLS

- 4 cups flour
- 1 teaspoon salt
- 6 teaspoons Dr. Price's Baking Powder
- 1 tablespoon shortening
- 1½ cups milk

Sift together flour, salt and baking powder; rub in shortening; add milk, and mix with spoon to smooth dough easy to handle on floured board. Turn out dough; knead quickly a few times to impart smoothness; divide into small pieces: form each by hand into short, rather thick tapering rolls; place on greased pans and allow to stand in warm place 15 to 20 minutes; brush with milk. Bake in very hot oven. When almost baked brush again with melted butter. Bake 10 minutes longer and serve hot. If a glazed finish is desired, before

taking from oven brush over with yolk of egg which has been mixed, with a little cold water.

These rolls make excellent sandwiches, using for fillings either lettuce and mayonnaise, sliced or chopped ham, chopped seasoned cucumbers, egg and mayonnaise with a very little chopped onion and parsley, or other filling desired.

RYE ROLLS

- 4 cups rye flour
- 1 teaspoon salt
- 6 teaspoons Dr. Price's Baking Powder
- 1½ cups milk
- 1 tablespoon shortening

Sift together dry ingredients; add milk and melted shortening. Knead on floured board; shape into rolls. Put into greased pans and allow to stand in warm place 20 minutes. Bake in moderate oven 25 to 30 minutes.

POTATO ROLLS

- 4 cups flour
- 1 teaspoon salt
- 1 tablespoon sugar
- 7 teaspoons Dr. Price's Baking Powder
- 2 medium sized cold boiled potatoes
- Water or milk or equal quantities of each

Sift thoroughly together flour, salt, sugar and baking powder; rub in potatoes or add after putting through ricer; add sufficient liquid to mix smoothly into a stiff batter or soft dough. This will require about one and one-half cups. Divide into small pieces; knead each and shape into small rolls; place on greased pan and brush with melted shortening and allow to stand in warm place 15 to 20 minutes. Bake in hot oven and when nearly done, brush again with melted shortening.

NUT AND RAISIN ROLLS

- 2½ cups flour
- 4 teaspoons Dr. Price's Baking Powder
- ½ teaspoon salt
- 1 tablespoon sugar
- 5 tablespoons shortening
- 1 egg
- ⅔ cup milk
- Butter

- Raisins
- Chopped nuts
- ½ cup sugar

Sift flour, baking powder, salt and sugar together. Add melted shortening and beaten egg to milk and add to dry ingredients, mixing well. Turn out on floured board and knead lightly. Roll out very thin. Spread with butter and sprinkle with raisins, chopped nuts and small amount of granulated sugar. Cut into about 4-inch squares. Roll up each as for jelly roll. Press edges together. Brush over with yolk of egg mixed with a little cold water and sprinkle with nuts and sugar, and allow to stand in greased pan about 15 minutes. Bake in moderate oven from 20 to 25 minutes.

PARKER HOUSE ROLLS

- 4 cups flour
- 1 teaspoon salt
- 6 teaspoons Dr. Price's Baking Powder
- 2 to 4 tablespoons shortening
- 1½ cups milk

Sift flour, salt and baking powder together. Add melted shortening to milk and add slowly to dry ingredients stirring until smooth. Knead lightly on floured board and roll out one-half inch thick. Cut with biscuit cutter. Crease each circle with back of knife one side of center. Butter the small section and fold larger part well over the small. Place one inch apart in greased pan. Allow to stand 15 minutes in warm place. Brush each with melted butter and bake in moderate oven 15 to 20 minutes.

RUSKS

- 2¼ cups flour
- ½ teaspoon salt
- 2 tablespoons maple or brown sugar
- 4 teaspoons Dr. Price's Baking Powder
- ¼ teaspoon nutmeg
- ¾ teaspoon cinnamon
- 2 tablespoons shortening
- ⅓ to ⅔ cup water
- 1 egg

Sift together flour, salt, sugar, baking powder, and spice; add melted shortening to beaten egg and water to make soft dough and mix well. Turn out on floured board; with floured hands shape into small rolls; place on greased shallow pan close together; allow to stand 10 to 15 minutes before baking; brush with milk and sprinkle with a little maple or brown sugar. Bake in moderate oven 20 to 30 minutes.

For hot cross buns, with sharp knife make deep cross cuts; brush with butter, sprinkle with sugar and bake.

CAKE

The baking of cake is of primary importance. Regulate the oven before putting materials together. When a cake is baked it shrinks from the sides of the pan. A light touch with the finger which leaves no mark is another indication that the cake is baked. Small and layer cakes require a hotter oven than loaf cakes.

Where fewer eggs than called for are used, increase the amount of Dr. Price's Baking Powder about one teaspoon for each egg omitted.

If an unsalted shortening is used take slightly less and add a small quantity of salt.

Sift flour before measuring and use level measurements for all materials.

PASTRY

A small amount of Dr. Price's Baking Powder will make pastry lighter, more tender and more digestible.

Pastry should rise in baking to double its thickness, and be in light, flaky, tender layers. The novice must learn to handle it lightly and as little as possible in rolling and turning. All materials should be cold and pastry is improved if put into the icebox as soon as made and allowed to stand several hours before using.

Pastry flour is better than bread flour for pie crust.

PLAIN PASTRY

This recipe is for one large pie with top and bottom crust.

- 2 cups flour
- 2 teaspoons Dr. Price's Baking Powder
- ½ teaspoon salt
- ½ cup shortening
- Cold water

Sift together flour, baking powder and salt; add shortening and rub in very lightly with tips of fingers. Add cold water very slowly, enough to hold dough together (do not work or knead dough). Divide in halves; roll out one part very thin on floured board, and use for bottom crust. After pie is filled roll out other part for top. Place loosely over pie, bringing pastry well over edge of pie plate. Trim off extra paste. Press edges of pastry with fork. Prick or cut two or three slashes in top of pie crust and bake in hot oven.

RICH PASTRY

- ½ teaspoon Dr. Price's Baking Powder
- ½ teaspoon salt
- ⅔ cup shortening
- Cold water

put on in small pieces half remaining shortening; fold upper and lower edges in to center; fold sides in to center; fold sides to center again; roll out thin and put on pie plate. Repeat with other half for top crust.

APPLE PIE

Roll half out on floured board, line bottom of pie plate; fill in apples, which have been washed, pared and cut into thin slices; sprinkle with sugar and dot with small pieces of butter; flavor with cinnamon or nutmeg; wet edges of crust with cold water; roll out remainder of pastry; cover pie, pressing edges tightly together. Trim off extra paste. Prick top of crust with fork or knife and bake in moderate oven 30 minutes. Sprinkle with powdered sugar and serve hot.

If glazed crust is desired, brush edges after baking with boiling hot syrup (2 tablespoons syrup and one tablespoon water) and return to oven for one or two minutes until syrup hardens. Fill the baked crust with fresh selected hulled strawberries and cover with syrup made as follows:

Add $\frac{1}{2}$ cup sugar and $\frac{1}{2}$ cup strawberries to 2 cups boiling water; bring to a boil and strain; add one tablespoon cornstarch which has been mixed with little cold water. FROZEN DESSERTS

HOW TO FREEZE

Scald ice cream can, cover and dasher, adjust can in freezer; put in dasher; pour in mixture to be frozen and fasten cover (the can should never be more than $\frac{3}{4}$ full); adjust crank and turn once or twice. Fill space around can to within an inch of top with ice and salt (three parts crushed ice to one part salt), packing hard. Turn slowly at first, increasing speed when mixture begins to stiffen. Add more ice and salt as required. When mixture is very firm, wipe off cover, open can and remove dasher; scrape frozen mixture from dasher and sides of can, and pack down solidly; cover with paper and replace cover. Put cork in opening in cover. Pour off salt water if there is danger of its getting into the can. Fill up over top of can with ice and salt (four parts ice to one part salt). Cover freezer with heavy blanket and keep in cool place until ready to serve.

SOUPS

The basis of all good soups is the stock or liquid in which bones, cooked or uncooked meat or vegetables have been boiled.

The proportions for soup stock are generally one pound meat and bone to one quart water. The meat should be cut into small pieces and put into kettle with bones, covered with cold water and cooked slowly for several hours.

Gravies and browned pieces of meat are often added to the soup kettle for color and flavoring.

The stock should be strained, quickly cooled and all fat removed.

Cream soups are made with a cream sauce foundation to which is added strained pulp of vegetables or fish.

Cut fish into convenient pieces, and lay over potatoes; sprinkle with rest of onion; add seasoning and enough water to come to top of fish; cover closely and cook until potatoes are done; add milk and let it scald up again. BOILED LOBSTERS OR CRABS

Lobsters should be purchased alive and plunged into boiling water in which a good proportion of salt has been added. Continue to boil according to size about 20 minutes. Crabs should be boiled in the same manner, but only a little more than half the time is necessary.

The only parts of lobster not used are the "lady," gills and intestinal cord.

To open a boiled lobster, wipe off shell, break off large claws; separate tail from body; take body from shell, leaving "lady" or stomach, on shell. Put aside green fat and coral; remove small claws; remove woolly gills from body, break latter through middle and pick out meat from joints. Cut with sharp scissors through length of under side of tail, draw meat from shell. Draw back flesh on upper end and pull off intestinal cord. Break large claws and remove meat.

MEATS

ROASTING

Wipe meat with damp cloth. Trim and tie into shape if necessary. Put some pieces of fat in bottom of pan and season with salt and pepper. Have oven very hot at first and when meat is half done reduce heat. Baste every 10 to 15 minutes. If there is danger of fat in pan being scorched add a little boiling water. Roast 10 to 15 minutes for each pound of meat, in proportion as it is desired rare or well done.

BROILING

The rules for roasting meat apply to broiling, except that instead of cooking in the oven it is quickly browned, first on one side and then on other, over hot coals or directly under a gas flame, turning every minute until done. Meat an inch and one-half thick will broil in 8 to 15 minutes. Season after it is cooked.

PAN BROILING OR FRYING

Put meat to be broiled or fried in very hot frying pan, with very little or no fat. Turn every few minutes until cooked. Season and serve immediately. Steaks and chops may be pan-broiled without any fat in the pan. For thin gravy pour a little boiling water into pan after meat is taken out.

BOILING AND STEWING

Fresh meat should be put into boiling water and boiled over hot fire for about 5 minutes; reduce heat and boil very gently about 20 minutes for each pound. Salt and spices may be added for seasoning; vegetables may be boiled in water with the meat. The broth of boiled meat should always be saved to use in soups, stews and gravies. Salt meats should be put over the fire in cold water, which as soon as it boils should be replaced by fresh cold water, repeating until water is fresh enough to give meat a palatable flavor. Salted and smoked meats require about 30 minutes very slow boiling, to each pound. Vegetables and herbs may be boiled with them to flavor. When they are cooked the vessel containing them should be set where they will keep hot without boiling until required, if to be served hot; if to be served cold, they should be allowed to cool in the liquor in which they were boiled. Very salty meats, or those much dried in smoking should be soaked overnight in cold water before boiling.

POT ROASTING

A tough cut of meat may be first browned in fat, then cooked in small amount of water either in oven or in iron kettle on top of stove. This method requires long, slow cooking.

FIRELESS COOKERY

The Fireless Cooker has become an important factor in the home. The principle employed is the preservation of heat by the use of non-conducting materials. The device ordinarily used is a rectangular box lined on all sides with some substance which will prevent escape of heat, with spaces or wells for stone or metal discs or radiators, and vessels containing food to be cooked.

The advantages of this method are: the improvement in flavor occasioned by the slower cooking with little opportunity for evaporation, the improved appearance of food that is subject to shrinkage when cooked by ordinary methods; the saving in labor and time, as the cooking practically takes care of itself. Dinner may be prepared in the morning, placed in the cooker, and without further attention be ready to serve after 3 or 4 hours. While the time required for cooking is somewhat longer than in the usual methods, the actual time consumed in preparation of a meal is considerably reduced.

General Directions

Prepare food for cooking as usual. Place in special vessel, designed to fit into wells of Fireless Cooker, and heat on range or over gas flame until ordinary cooking temperature is reached. Put into cooker with one or more radiators which have been heated for 10 or 15 minutes over hot fire. For roasting, radiator should be hot enough to brown a pinch of flour immediately. Close cover, fasten lightly so that the steam may escape and allow cooking to proceed for time specified in recipes.

For baking cake, apples, etc., proceed as for roasting. The time required for baking is

slightly longer than that specified for regular ovens. For cake ordinarily baked in a moderate oven, heat radiators hot enough to brown a pinch of flour in half a minute.

CEREALS

Prepare cereal for cooking in double boiler as usual. Boil over fire for 5 minutes; place in larger vessel of boiling water in cooker, and allow it to remain 4 or 5 hours or longer. If placed in cooker at night it should remain warm enough to serve for breakfast.

STEAMING

For recipes see "Boston Brown Bread," "Poor Man's Pudding," "Christmas Plum Pudding," etc. Prepare and mix ingredients as directed. Put into greased molds and place in shallow pan of boiling water over very hot radiator in cooker. Fasten cover tight and cook for 5 to 6 hours.

SOUPS

For ingredients and preparation of soups see pages 29 and 30.

Place ingredients in a vessel; cover with cold water; bring to boil over free flame and boil 5 minutes. Fasten cover and transfer to cooker, using one hot radiator in bottom of well. Cook 4 or 5 hours, season and serve.

BOILED OR STEWED MEATS

Prepare meat for cooking as usual, searing in frying pan if desired brown. Place in large vessel and cover or partly cover with boiling water, boiling with cover fastened tight for 10 or 15 minutes over free flame. Transfer to cooker, using one hot radiator underneath. Cook 2 or 3 hours, season and serve.

ROAST MEATS

Prepare and season meat in usual way. Place in large dry vessel; put very hot radiator in bottom of cooker well; place vessel containing roast on radiator, and place another very hot radiator on top. Close cooker and fasten. Allow it to remain about one-half hour per pound of meat.

The roast may be browned in a very hot oven before putting into cooker or just before serving.

VEGETABLES

Prepare vegetables as usual. Place in vessel with small quantity of boiling water. As there is little evaporation in tireless cookers, allowance does not have to be made for loss by evaporation. Boil over free flame for 5 to 10 minutes. Transfer to cooker, using one radiator in bottom of well. Cook 3 or 4 hours, remove from cooker, season and serve.

PRESERVING AND CANNING

(Material adapted from U.S. Food Administration and N.Y. State Department of Agriculture.)

GENERAL DIRECTIONS

Test all jars for leakage before using. To do this, fill with water, put on rubber and cover, seal and invert.

Sterilize all utensils, jars, covers, etc., by covering with cold water, and boil for 10 minutes. Use only new rubbers and dip in boiling water just before using.

Use wide-mouthed funnel when filling jars to avoid loss of material and keep jar rim clean.

Invert all jars after filling and sealing.

Fruit should be sound, firm and not overripe and carefully prepared.

Clean fruit, clean hands, clean utensils, and a clean kitchen free from flies, are essential for safety and success.

Keep products in a cool place. Avoid freezing in winter.

CANNING

Canning is the process of preparing sterilized food so that it will keep indefinitely.

The custom of canning fruit in syrup is based on the improvement in flavor and texture which sugar gives to fruit. Sugar is not necessary for its preservation. Success depends upon thorough sterilization—that is, killing the organisms which cause food to spoil, and then sealing perfectly to prevent their entrance. Fruit may be canned in water, in fruit juice and in syrup.

PRESERVING

The only difference between preserving and canning fruit is that sugar is always used in preserving, while in canning it is used in smaller quantity or not at all. In preserving the old rule of equal weights of sugar and fruit may be followed.

OPEN-KETTLE METHOD

This method is generally used for preserves, jams, and marmalades. Food is completely cooked and then poured boiling hot into sterilized jars.

Prepare fruit, which may or may not be peeled, and cut into pieces depending on the variety. Blanch or scald peaches and similar fruits to loosen skin and chill by plunging into cold water. Cook slowly in as little water as possible or in fruit juice or fruit syrup until done. Fill sterilized jars, seal and invert.

CAN-COOKED METHOD

By this method uncooked or partly cooked food is packed in can or jar, covered with liquid and both jar and contents sterilized.

Pare fruit if desired or blanch or scald in boiling water a small quantity of fruit at a time. (See time table.) Do not blanch cherries, sour cherries excepted, berries or plums.

Chill outside of blanched fruit by immersing a few minutes in a large vessel of cold water. Remove skin from such fruits as peaches.

Pack fruit firmly in clean, tested jars to within one-half inch of top.

Fill jars to within $\frac{1}{4}$ inch of top with boiling water, fruit juice or syrup.

Place new rubber on each jar, adjust cover and partly seal.

Place jars on false bottom of water bath and sterilize for required time. See time-table. If the hot-water bath is used, jars should be immersed in sufficient boiling water to cover tops to depth of about 1 inch. Do not begin to time the sterilizing until water boils. Keep water boiling during sterilizing period.

Remove jars from sterilizer. Seal them and invert to cool. Avoid draft on jars, but cool as rapidly as possible.

Wash jars and label. Wrap in paper or store in a dark place to prevent loss of color of red fruit.

Vegetables may also be canned by this method.

USE OF SUGAR IN CANNING FRUIT

Sugar is used in canning fruit for the purpose of improving flavor and is not necessary for preservation.

Thin Syrup—1 part sugar to 2 parts water for sweet fruits.

Medium Syrup—1 part sugar to 1 part water for berries and medium sweet fruits.

Thick Syrup—2 parts sugar to 1 part water for sour fruits.

To make syrup add sugar to boiling water. Stir until all sugar is dissolved, boil 2 or 3 minutes.

CANNED PEACHES

Have ready a syrup by boiling sugar and water together until sugar has dissolved, using $\frac{1}{2}$ to $\frac{3}{4}$ cup sugar to each cup water. Allow 1 cup syrup to each quart jar of peaches and add 1 peach pit to each quart syrup.

Scald sound, firm freestone peaches, a small number at a time, in boiling water just long enough to loosen skins; dip quickly into cold water and slip off skins. Cut peaches in halves and remove stones.

Can-cooked method.—Pack peaches in overlapping layers with rounded side upper-most facing glass. Fill each jar with hot syrup and adjust rubber, cover, and upper clamp, thus partly sealing jar. Place jars on rack in hot water that covers the tops to a depth of 1 inch. Bring water to boiling point, and boil pint jars 16 minutes, quart jars 20 minutes. Remove jars, seal, and invert to cool.

Open-kettle Method.—Cook peaches in syrup until tender; then with sterilized spoon slip them carefully into sterilized jar; fill jar to overflowing with syrup. Adjust rubber, cover, seal immediately, and invert to cool.

CANNED CHERRIES

Wash and pit cherries. Can sweet cherries as berries. Blanch sour cherries $\frac{1}{2}$ minute, in boiling water. Dip in cold water; drain and pack closely into hot sterilized jars. Cover with boiling water or boiling medium syrup. Loosely seal. Sterilize 16 minutes in boiling water bath. Remove jars at once, tighten covers, invert to test the seal and cool.

CANNED PEARS

Wash and peel fruit and follow directions for canned peaches.

CANNED BERRIES

Blackberries, blueberries, huckleberries, raspberries, loganberries, gooseberries and strawberries should be canned as soon as possible after picking. Hull or stem; place in strainer and wash by lifting up and down in pan of cold water.

Pack into hot sterilized glass jars, using care not to crush fruit. To insure a close pack put a 2 or 3 inch layer of berries on the bottom of the jar and press down gently with a spoon. Continue in this manner with other layers until jar is filled. Boiling water or boiling thin or medium syrup should be poured over the fruit at once. Loosely seal. Sterilize 16 minutes in boiling water. Remove jars, tighten covers, invert to test seal and cool.

ASPARAGUS

Asparagus must be fresh and tender. Select tips of uniform size and maturity, wash, cut into lengths according to containers to be used. Scrape off scales and tough outer skins and tie in bundles to fit jar.

Immerse lower ends in boiling water for 5 minutes, then entire stalks, for 3 minutes longer.

Cold dip, drain, pack neatly, tips up, in hot sterilized jars. Add salt and cover with boiling water. Loosely seal, sterilize two hours in boiling water bath. Remove as soon as time is up. Tighten covers, invert to test seal and cool.

BEANS

String Beans and Wax Beans.—Wash, string, leave whole or break in uniform pieces. Blanch 5 to 10 minutes or until the pod will bend without breaking. Cold dip, drain well and pack into hot jars. Add salt and cover with boiling water. Loosely seal and sterilize two hours in boiling water. Tighten covers, invert to test seal and cool.

CORN

Select tender juicy sweet corn, at the best stage for table use and can as soon as possible after gathering. Remove husks and silk; blanch tender ears 5 minutes, older ears 10 minutes. Cold dip and cut from cob. Pack into hot sterilized jars. As corn swells during sterilization, leave space of 1 inch at top. Add salt and cover with boiling water. Be sure water penetrates through the corn to the bottom of jar. Loosely seal and sterilize 3 hours in boiling water. Remove, tighten covers, invert to test seal and cool.

JAMS

Jams are usually made with small fruits or chopped large fruits. Cook slowly with equal weight of sugar until thick; put into sterilized tumblers or small jars and seal.

RASPBERRY JAM

Pick over berries. Mash a few in bottom of preserving kettle; continue until fruit is used. Heat slowly to boiling point and add equal quantity of heated sugar. Cook slowly 45 minutes. Put into sterilized jars or tumblers. Other berry jams can be made in same way.

PLUM CONSERVE

- 4 pounds plums
- 1 cup seeded raisins
- 2 oranges
- sugar
- juice 1 lemon
- ½ pound walnuts

Wash plums; remove stones; add raisins and oranges which have been sliced very fine. Measure and add $\frac{3}{4}$ cup sugar to each cup fruit and juice. Put into kettle, cook slowly about 45 minutes or until thick, stirring to keep from burning. Add lemon juice and chopped nuts. Pour into sterilized jars.

JELLIES

Heat and mash fruit until juice runs readily. If fruit is not entirely broken rub through coarse sieve. Pour into sterilized jelly bags of unbleached muslin or doubled cheesecloth and drain but do not squeeze. Take $\frac{7}{8}$ cup sugar for each cup of juice. Boil juice 8 to 20 minutes (berries and currants require less time); add sugar which has been heated in oven; stir until sugar is dissolved and boil about 5 minutes. Pour into hot sterilized tumblers. Hard fruits like apples and quinces should be cut up, covered with cold water and cooked until tender before turning into jelly bags.

PICKLES

PICKLED PEACHES

- 2 pounds brown sugar
- 2 cups vinegar
- 1 ounce stick cinnamon
- ½ ounce whole cloves
- 4 quarts peaches

Boil sugar, vinegar and spices for 20 minutes. Dip peaches quickly in hot water then rub off the fuzz with a cloth. Cook a few peaches at a time in the syrup, cook until tender. Pack in sterilized jars. Adjust sterilized rubbers, and fill each jar to overflowing with hot strained syrup. Seal jars immediately.

CHOW CHOW
